 Maharashtra, Kolhapur

OBJECTIVE

Highly motivated and detail-oriented Computer Science undergraduate, with a strong foundation in full-stack development, data structures, and software design principles. Passionate about leveraging technical skills to solve complex problems and contribute to meaningful software solutions. Looking forward to working in dynamic, growth-oriented environments that encourage innovation, learning, and collaboration.

SKILLS

- **Programming Languages:** Python, Java, C,C++,C#, HTML, CSS, JavaScript
- **Frontend:** React.js, Bootstrap, Responsive Design, Basic UI Animations
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MySQL
- **Full Stack:** MERN (MongoDB, Express.js, React.js, Node.js)
- **Design:** Figma (Wireframes, UI/UX, Interactive Prototypes)
- **Tools:** Git, GitHub, VS, VS Code, STS, Eclipse, Power BI
- **Other :** Data structure and algorithms(DSA), Operating system(OS), Computer Networking(CN).

EXPERIENCE

DKTE Startup

Intern

Present

- Led end-to-end development of a secure document approval platform used by political assistants.
- Integrated AES encryption for secure file transfer and built a user-friendly interface for role-based workflows.
- Participated in regular code reviews, collaborated using Git, and contributed to product testing and iteration.

Cognifyz Technologies

Virtual Internship

- Assisted in frontend module development and worked with backend APIs for dynamic data rendering.
- Enhanced debugging and version control practices through team codebase interactions.

EduSkills

Virtual Internship

- Contributed to web design tasks during instructor-led learning on frontend frameworks.
- Explored GitHub and Jenkins integration for simplified DevOps exposure.

Edunet Foundation

Virtual Internship

- Created a responsive e-commerce platform supporting user authentication, shopping cart, and order flow.
- Prioritized user experience with mobile-first design and clean UI implementation.

Innovation, Entrepreneurship, and Startup Cell

Student Coordinator

- Coordinated multiple entrepreneurial bootcamps, startup mentorship drives, and coding marathons.
- Fostered connections with alumni, startups, and domain experts to enhance student innovation.

PROJECTS

- **Smart Agriculture Monitoring System (IoT)** – Built an IoT-powered device network with Arduino to monitor real-time environmental data for farmers. Enabled precision agriculture with remote access and alerts.
- **Library Management System (C)** – CLI-based book inventory system with file handling logic. Managed issue/return operations, late fee calculation, and basic reporting features.
- **Student Management System (C++)** – Console program managing student info, subject scores, and attendance with OOP techniques. File I/O ensured data persistence.

- **Applicant Tracking System (MERN)** – Created a job management dashboard for HR professionals with user login, resume screening, and scheduling. Built using React, Node, and MongoDB.
- **Bank Management System (Python)** – Desktop app using Tkinter GUI and SQLite backend for real-time account operations, secure logins, and transaction logs.
- **ATM Management System (Java)** – Built a command-line ATM simulation with PIN authentication, withdrawal, deposit, and transaction history features.
- **Smart Chatbot (Python)** – Simple NLP-powered chatbot with custom greetings and keyword recognition logic. Tested in terminal.
- **E-commerce Website (MERN)** – MERN-based full stack website with product filtering, dynamic routing, JWT-based auth, and order confirmation email features.
- **Waste Management System(Website)**-Designed a full-stack web Application using HTML, CSS, JavaScript, PHP, and MYSQL to report waste-affected areas with photo upload, providing details through an interactive form with 50+ test users during trials.
- **To-Do List App-(.NET)** Developed a C# Windows Forms To-Do List application with add, edit, and delete task functionality using DataGridView.
- **Create a custom calendar in Power BI**- Built a custom calendar table in Power BI to enable advanced time intelligence and dynamic reporting.

EDUCATION

B.Tech, Computer Science and Engineering	<i>May 2026 (Expected)</i>
D.K.T.E Society’s Textile and Engineering Institute, Ichalkaranji <i>CGPA: 8.67</i>	
Diploma, Computer Science and Engineering	<i>June 2023</i>
Yashwantrao Chavan Polytechnic, Ichalkaranji <i>Percentage: 88.91</i>	

EXTRACURRICULAR

- Microsoft Student Learn Ambassador – led coding sessions, community outreach, and mentoring juniors.
- Pursuing Honors B.Tech in Data Science – includes machine learning, data visualization, and project-based learning.
- Presented Eureka project at IIT Bombay – top-ranked team at college level; zonal finalist among 100+ entries.

CERTIFICATIONS
